

Certificate of Conformance

- All products furnished by **STERIL-AIRE** were produced, inspected and tested in conformance with all contractually applicable requirements of the purchase orders, drawings and specifications pertaining to those products.
- Steril-Aire UVC light fixtures are made in the USA.
- All Steril-Aire Emitters™ meet the UVC requirements (253.7 nm) and are specifically designed to not produce any ozone gas.
- The UVC light from Steril-Aire's Emitters™ will not penetrate most glass (except for quartz) and most plastics (except for some members of the Teflon family).
- Steril-Aire is a facility registered to **ISO 9001:2015 & ISO 14001:2015** by **UL DQS**.
- All Steril-Aire fixture products have been safety rated in accordance with **UL Standard 1995 5th Edition. (REF: UL 2998 / UL 867)**
- The raw materials and/or parts used have been obtained from approved sources supported by certificates and/or test reports.
- All processes required in the production of these materials, parts and/or assemblies were performed by a facility specifically approved by Steril-Aire, Inc. Quality Assurance and/or buyer when such approval is required by applicable specification or contractual requirement(s) of the purchase order.
